SITE DATA

- 1. Location: _____ 1/4, _____ 1/4, Section _____, Township _____, Range _____
Street Address: _____
- 2. Type of Development: New Construction** _____ Substantial Improvement** _____ Minimum Improvement _____
Filling _____ Grading _____ Excavation _____ Other _____

****Notice: FEMA Elevation Certificate MUST be attached to permit.**

- 3. Description of Development: _____
- 4. Structure: New Structure sq ft. _____ Existing Structure sq ft. _____ + Improvements sq ft _____ = Total sq ft _____
Principal use _____ Accessory uses (storage, parking, etc.) _____
- 5. Value of Improvement (fair market): \$ _____ Pre-Improvement/Assessed value of structure \$ _____

6. Development Located in a Designated: FLOODWAY? Yes _____ No _____ FLOODWAY FRINGE? Yes _____ No _____
IF LOCATED IN FLOODWAY, NO-RISE CERTIFICATION MUST BE PROVIDED PRIOR TO THE ISSUANCE OF A PERMIT TO DEVELOP THAT STATES THE PROPOSED DEVELOPMENT WILL RESULT IN NO INCREASE IN THE BASE FLOOD (100-YEAR) ELEVATION.

7. FEMA Flood Map Panel Number: _____ Effective Map Date: _____

ELEVATIONS (indicate datum used): NGVD _____ NAVD _____

- 8. Elevation of 100-Year Flood / Base Flood Elevation (BFE) at development site: _____ Feet
- 9. Elevation of development site: _____ Feet
- 10. Elevation of lowest floor of residential development (minimum one foot above BFE): _____ Feet
- 11. Elevation of floodproofing for non-residential development (minimum one foot above BFE): _____ Feet
- 12. Other floodplain elevation information (identify and describe source): _____ (attach to permit)
- 13. Other Permits required? a. United States Army Corps of Engineers Section 404 Permit: Yes _____ No _____
(attach copies to permit) b. Kansas Department of Agriculture Division of Water Resources: Yes _____ No _____
c. Other Permits _____

14. This permit is in compliance with all provisions of Floodplain Management Resolution # 2013-17

NOTICE: Read Carefully. This permit is issued with the condition that the lowest floor (including basement) of any new or substantially-improved (over 50% current market value) residential structure will be elevated at least one (1) foot above the base flood elevation. If the proposed development is a non-residential structure, this permit is issued with the condition that the lowest floor (including basement) of any new or substantially-improved non-residential structure will be elevated or floodproofed at least one (1) foot above the Base Flood Elevation. This permit is issued with the condition that the developer/owner will provide a FEMA Elevation Certificate completed by a registered engineer, architect, or land surveyor of the "as-built" lowest floor elevation of any new or substantially-improved structure covered by the permit.

Permit Decision: Approved Denied (attach explanation) this _____ day of _____, 20 _____

Print Name and Title of Owner or Developer _____ Print Name and Title of Authorizing Community Official _____

Signature of Owner or Developer _____ Date _____ Signature of Authorizing Community Official _____ Date _____

INSTRUCTIONS

Section A: Complete the name and contact information of applicant. It is preferred that this be the information of the property owner. Circle owner or builder depending on applicant.

Section B: Complete information in this section describing location of the development. Space is provided for other locator such as parcel identification number or name of subdivision. For a long legal description, the information could be attached separately and noted here. It is also suggested to attach a FIRMette of the location.

Section C: *For new construction and substantial improvements an elevation certificate is required. An elevation certificate based on construction drawings can be used at the start of construction. A finished construction elevation certificate is required when the project is complete. Minor projects may not require an elevation certificate. For example: a new culvert.

Section D: Describe the development. Is this a substantial improvement? Substantial improvement may require that the entire structure be brought up to current standards and that the lowest floor (including basement) be elevated one (1) foot above the base flood elevation.

Section E: Flood map information. For a project in a designated floodway a no-rise certificate is required. In an area of detailed study when a floodway has not been designated it must be determined that development will not cause more than one (1) foot of rise.

Section F: Specify if National Geodetic Vertical Datum of 1929 or North American Vertical Datum of 1988 was used for the elevation information in this section. **Lowest floor of a residential structure (including basement) and level of floodproofing for a non-residential structure must be one (1) foot above the base flood elevation. In a house that has a basement the lowest floor is the floor of the basement. This information will be on an elevation certificate. There should be an elevation certificate for every post-FIRM structure. If other sources of elevation information were used please specify where that information came from. For certain types of projects the elevation information may not apply. For example: excavation of a borrow pit. In those situations use N/A in the blanks for elevation information. Elevation certificates are not required for projects. Projects that do not require elevation certificates are excavation, culverts and parking lots.

Section G: The Kansas Department of Agriculture, Division of Water Resources requires permits for fill placed in floodplains. Permits are also required for levees, stream obstructions, and dams. Some minor projects are exempt based on the amount of fill, upstream drainage, or the size of the dam. US Army Corps of Engineers may require permits involving wetlands or projects that could alter the course of a navigable water way.
